Section 1194.41 (a) Information, Documentation and Support	Supported with planned upgrade in 2012. Please refer to sections below.	

**Section 1194.22 Web-based Internet Information and Applications - Detail
Section 508 Voluntary Product Accessibility Template**

Criteria	Supporting Features	Remarks and explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Supported for Web Sites generated by CM1, Percussion has committed to an update of CM1 contributor interface in 2012 with this full certification.	Alt text as well as labels and descriptions are available in all browser interfaces.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Supported for Web Sites created by CM1 and the CM1 interface	Percussion CM1 does not use multi-media presentations as part of the browser interface.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Supported for Web Sites created by CM1 and the CM1 interface	Text identifiers, such as asterisk or other HTML markup is always used in addition to color.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Supported for Web Sites generated by CM1, Percussion has committed to an update of CM1 contributor interface in 2012 with this full certification.	Style sheets (including templates and CSS) are optionally added to CM1 based sites. An option to view pages w/o style sheets "outline mode" will be available in the fully certified UI update.
(e) Redundant text links shall be provided for each active region of a server-side image map.	Supported	Image maps are not used in the browser interface.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Supported	Image maps are not used in the browser interface.
(g) Row and column headers shall be identified for data tables.	Supported	All headers in the browser interface are so identified.
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Supported	Appropriate HTML markup is present in relevant tables.

(i) Frames shall be titled with text that facilitates frame identification and navigation	Supported	Frames, where used, are compliant.
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Supported	No flickering page elements are used.

<p>(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.</p>	<p>Supported for Web Sites generated by CM1, Percussion has committed to an update of CM1 contributor interface in 2012 with this full certification.</p>	<p>Wherever Percussion CM1 has visual interfaces, such as the WYSIWYG Page Editor environment, several "text only" or "outline mode" views and controls are planned as an alternative and within that environment that allow editing in a non-visual form (up down arrow and keyboard).</p>
<p>(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.</p>	<p>Supported for Web Sites generated by CM1, Percussion has committed to an update of CM1 contributor interface in 2012 with this full certification.</p>	<p>This is a key part of the planned UI certification for 2012.</p>
<p>(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).</p>	<p>Supported</p>	<p>No applets are used in the CM1 user interface.</p>
<p>(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>	<p>Supported for Web Sites generated by CM1, Percussion has committed to an update of CM1 contributor interface in 2012 with this full certification.</p>	<p>This is a key part of the planned UI certification for 2012.</p>
<p>(o) A method shall be provided that permits users to skip repetitive navigation links.</p>	<p>Supported for Web Sites generated by CM1, Percussion has committed to an update of CM1 contributor interface in 2012 with this full certification.</p>	<p>This is a key part of the planned UI certification for 2012.</p>
<p>(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.</p>	<p>Supported</p>	<p>No timed responses are required in the browser interface.</p>

**Section 1194.31 Functional Performance Criteria - Detail
Section 508 Voluntary Product Accessibility Template**

Criteria	Supporting Features	Remarks and explanations
(a) Vision: At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for assistive technology used by people who are blind or visually impaired shall be provided.	Percussion has committed to a release of CM1 in 2012 with this full certification.	Percussion CM1 contributor interfaces will be made to available here through the use of Assistive Technology. Specifically the Freedom Scientific JAWS Screen Reader will be certified to provide support for the visually impaired.
(b) Visual acuity: At least one mode of operation and information retrieval that does not require visual acuity great than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for assistive technology used by people who are visually impaired shall be provided.	Percussion has committed to a release of CM1 in 2012 with this full certification.	Percussion CM1 will supports this through Assistive Technology screen magnifiers.
(c) Hearing: At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for assistive technology used by people who are deaf or hard of hearing shall be provided.	Supported	In all cases that Percussion CM1 provides an audio cue, a visual cue is provided as well.
(d)Audio Information: Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Supported	Volume control for Percussion CM1 is provided entirely through the underlying operating system.
(e) Speech: At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for assistive technology used by people with disabilities shall be provided.	Supported	Speech recognition is not required to access any information or commands within Percussion CM1.

<p>(f) Motor Skills/Coordination: At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.</p>	<p>Supported</p>	<p>Percussion CM1 supports simple keyboard controls in all areas.</p>
